

On The Floor

Written, Composed, Arranged, Produced & Engineered by Raza

Take me take me in your arms
Hold me tight
We make love all night
I'll take you take you on the floor
Baby Girl
We gonna dance the night

Your body is moving with grace and a style
Makes me want you more when you just smile
I ain't for the moment I've come here to stay
And you'll know in time, so I wait for that day
As for now I don't know what to say....but I go
Repeat Chorus

Rap:
Let the rhythm flow in your soul
Let your body roll, tap your feet and toe
You gotta get up on the floor and make your move
Everybody needs to pump and get in the groove
Wanna show ya that I care for you
I hold ya, I'll keep you warm
And my sweet small talk are a piece of day
Alright baby, let's make my day

The closer we get, it's the better we move
I can take you right into the groove
I ain't pushing my feelings I am taking it slow
Do you know that I got something to show
Though I don't know what to do ... So
Repeat Chorus
